9.	Concerns/Issues (Please feel free to describe any concerns or issues you have around Target 2)	If there is no funding for this post MBPCT will not be able to provide a domiciliary physiotherapy service to IMC. This could result in patients having to stay in Hospital longer, and they will not achieve their maximum level of independence . Since the end of 2005 IMC seems to have become the accepted

		<p>pathway for CVA's. This requires a large physio rehab input for patients to regain their mobility as quickly as possible. If this post is not funded this will be jeopardised</p> <p>Without PSA rewards funding for 06/07: Key Performance Indicators for Health and Social Services will not be met.</p> <p>Patients who remain on the waiting list are at risk of falls or losing their place in the community due to loss of independence leading to increase in admissions to 2° care (PSA agreement- keeping people out of 2° care) patients on Domiciliary Rehab scheme will not receive a full service from the MDT in Intermediate Care.</p> <p>Failure to address gaps in service provision when setting local targets (SfBH)</p> <p>Inability to maintain core standards and work towards achieving relevant developmental standards within the OT service. (SfBH)</p>
